

ANT24 & ANT25 Hydro Twister Surface Cleaners

Hydro Tek is pleased to announce the new 24" deck Trident Hydro Twister® Series. These two surface cleaners are constructed of stainless steel with a hardened aluminum rotary arm and a brush skirt to contain the splash. Available in choice of wheel preference: three casters for the convenience of free movement to wash side to side or choose the large, airless tires to reduce fatigue when working in straight lines. The unique spray arm and nozzle angles are effective for "to the edge" cleaning and cover more area (18,000 sq ft/hour), without zebra striping, to clean faster.

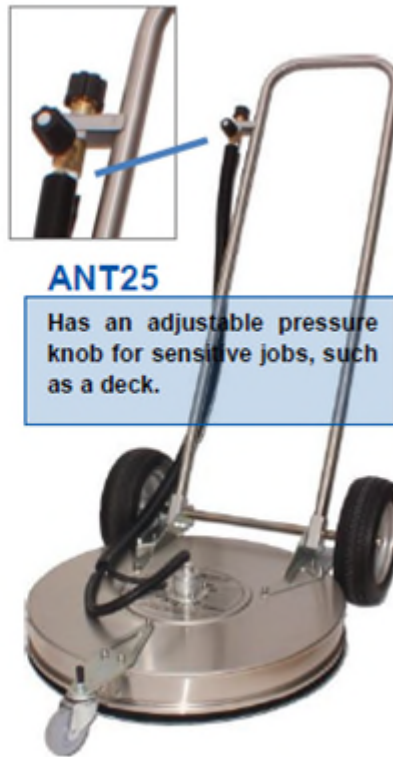

Model# ANT24, Three, non-marking casters

Model# ANT25, Large, airless rear tires, hoop handle, adjustable pressure

ANT24

Pressure hose is protected inside stainless handle.

ANT25

Has an adjustable pressure knob for sensitive jobs, such as a deck.
